ELSAG Advances ALPR Technology With Tactical Operations Center

In our committed efforts to improve our Automatic License Plate Recognition technology to better support law enforcement, we will soon introduce a new feature of the Mobile Plate Hunter-900® ALPR system, related to dispatch and networking. Our new Tactical Operations Center software will enhance the time-saving benefits of the MPH-900®. Every time an officer is alarmed that a suspect vehicle is nearby, he has the peace of mind of knowing that Dispatch is already aware of the situation. If back-up or chase cars are needed, they will automatically be alerted without any effort from the MPH-900® patrol officer.

Saving time not only saves money; in many cases, it saves lives. The MPH-900® is helping officers all over the world be more efficient, more effective and safer than ever before.

Fund Your MPH-900® With A New Grant From JAG!

Now, qualified government agencies can apply for funds from the **Edward Byrne Memorial Justice Assistance Grant Program CFDA #16.738**. Offered by The U.S. Department of Justice, Office of Justice Programs' (OJP) Bureau of Justice Assistance, this grant program is designed to assist state, local, and tribal efforts to prevent or reduce crime and violence, including improving the effectiveness and efficiency of criminal justice systems, processes, and procedures, based on their own local needs.

Registration with the OJP's Grants Management System is required before your application can be submitted. Applications are due by 8:00 pm eastern time, June 30, 2010. To find out if your agency qualifies for this grant program, go to www.ojp.usdoj.gov/BJA/grant/10jagallocations.html.

To download a copy of the Edward Byrne Memorial Justice Assistance Grant Program FY 2010 Local Solicitation, which includes instructions on how to apply, go to <http://www.ojp.usdoj.gov/BJA/grant/jag.html>. For a list of other funding opportunities for your MPH-900® ALPR technology, go to http://www.elsag.com/grant_assistance.htm.

Expanding Public Safety Technology Offerings

ELSAG North America is now an official distributor of the Gen 2 body scanning technology manufactured by US-based Brijot Imaging Systems. Used at many airports and government buildings, the system allows security screeners to easily detect concealed objects on individuals who pass through the unit, without physically touching them. The technology picks up the millimetric waves naturally given off by the body and measures the difference in heat between those waves and the concealed item. Only the profile of the person is shown as they are being scanned and Gen 2 poses no health risks because it does not emit any type of radiation or electromagnetic waves. It has been developed in accordance with specifications set out by the Transportation Security Administration. ELSAG is excited to offer this progressive technology to assist with public safety and security efforts worldwide.

Welcome New Partner Agencies!

ELSAG is proud to support the public safety and security missions of Florida's Palm Bay Police Department, Arizona's Morrow Police Department, as well as the efforts of New York's Ulster County BOCES to keep children safer by using the MPH-900® to identify drivers who pass stopped school buses. We are committed to you with 24/7 service and support.

Word On The Street

"The MPH-900® definitely saves time...I would say it's at least doubled our arrest stats."

- *Officer on Auto Theft Task Force, Metropolitan DC/ Maryland Area*

Visit Us At LEIM!

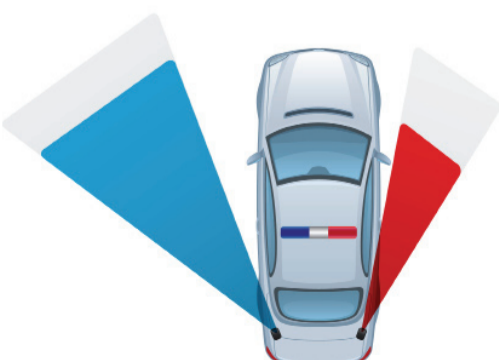

IACP/LEIM
34th Annual IACP LEIM Training Conference and Exposition
Atlanta, GA, May 24-27, 2010

During your time at LEIM May 24 – 27 in Atlanta, stop by our booth #210 to learn about the safety and force multiplying benefits of our

MPH-900® Automatic License Plate Reader technology. Learn how the MPH-900® can help serve your public safety missions, participate in a live, on-the-street demonstration and discuss ideas for funding the MPH-900® for your agency. Come by when you can or call us at 866.9.MPH.900 to set up a specific meeting time.

Digital Is Better

Did you know that ELSAG is the only ALPR provider that uses digital cameras to capture plates, nearly doubling the size of the plate image? The MPH-900® sees more than competitive products which use analog camera technology. Images taken by the MPH-900® provide more information because you can see more of the car and its surroundings which can aid investigations.

ELSAG Sweet Spot Competition Sweet Spot

YOUR MISSION...IS OUR MISSION.
