LICENSE PLATE READER TECHNOLOGY AVAILABLE**

The MPH-900® Is Critical To Many Law Enforcement Missions Today

ELSAG's Automatic License Plate Reader, the Mobile Plate Hunter-900® (MPH-900®) is deployed in more than eleven hundred agencies across the country. The dependable and accurate information provided by the MPH-900®, in addition to ELSAG's 24/7 commitment to customer support, have made it the preferred ALPR technology in America.

No other system comes close to its ease of deployment, capabilities, and accuracy.

With 70% of all criminal activity in the U.S. involving a vehicle, and with an estimated 40 million license privileges revoked, suspended or denied, the MPH-900's automatic license plate reading capabilities are critical to addressing a variety of missions.

- Highway and traffic safety
- Homeland Security initiatives
- Recovery of stolen vehicles and license plates
- AMBER Alerts and missions related to missing and exploited children
- Safe school initiatives such as perimeter security and school bus safety
- Development and maintenance of Hot Lists
- Drug interdiction
- Gang and racketeering interdiction
- Collection of delinquent taxes, fines, and fees
- Securing restricted areas through access control, monitoring, and enforcement

HOW THE MPH-900® WORKS

The MPH-900® Camera Range And Performance

- The Mobile Plate Hunter-900® (MPH-900®) operates at up to 150 mph (241 kph) closing speeds and passing speeds
- Works day or night, in any kind of weather
- Only ALPR that reads plates from all 50 states including flat and red character plates
- Performs ambiguous searches to improve accuracy
- Alerts within milliseconds if a vehicle is suspect
- Features multi-level alarms for prioritization—Wants, Warrants, Amber Alerts, etc.
- Can be configured with a variety of different camera ranges
- Can be configured to remotely alarm to an email recipient
- Can operate with data from different sources and be updated on the fly
- Mini camera available; 25% smaller and 30% lighter than predecessor

The MPH-900® In Action

Automatic license plate recognition cameras are attached magnetically to the body of the patrol car.

1 Officers on highways use cameras to scan plates of passing cars.

- Cameras can read plates from fast-moving vehicles.
- Locations and times of captured plates are stored.

Cameras can also scan in parking lots.

2 An infrared camera captures images of the plate.

3 A computer reads the plate characters and compares them with crime databases.
